# 1984 ANNUAL SUPPLEMENT

## INDEX AND REFERENCE LIST

**Title Index** ..... 1
**Author Index** ..... 5
**Subject Index** ..... 7
**Periodical List** ..... 11

## INDEX

This is the annual index for DATA PROCESSING DIGEST for the year 1984, Vol. 30, Nos. 1-12. The index is divided into three sections: the list of titles as they appeared in the Digest, a list of authors, and a subject index. All articles have at least one subject citation. Italicized titles are books, periodicals or reports. The numbers following the entries indicate issue and pages in which the item is found. The number preceding the hyphen is the issue; the numbers following the hyphen are the pages.

### TITLE

Accounts Usable, 2-18
ACT Unveils New Apricot Computer, 2-24
Adam: An Ada-based Language For Multiprocessing, 11-10
Adding Value To Networks, 2-14
Advanced System Development Techniques Avoid "Analysis Paralysis", 4-11
Adventures In Microland, 1-11
After Communications, What Then?, 7-3
Analyze Needs Before Selecting Packages, 4-3
Anatomy Of Decision Support, 8-7
*Annual Bibliography Of Computer-Oriented Books, Seventeenth Edition,* 4-34
*Apple BASIC for Business,* 6-28
*Applesoft BASIC,* 6-28
Application Of Artificial Intelligence In Sales, 7-28
Application Of Videotex In a Manufacturing Company, 12-21
*Application Prototyping,* 9-29
Applications Backlog Begs For an Effective Solution, 1-1
Applications Programming Done At Army Without Programmers, 4-21
Applications Software Survey, 6-16
Arbitration In Computer Contract Disputes: Myth vs. Reality, 11-17
Architecture Prototyping In the Software Engineering Environment, 7-18
Are Computer Screens an Office Menace?, 7-7
Are Your Computers Paying Off?, 2-13
An Assessment Of the Prototyping Approach To Information Systems Development, 8-12
Asynchronous Blast-Off, 6-14
AT&T: Position & Prospects, 1-25
Auditing Advanced Computerized Systems In the Future, 7-21
Auditing the Change Control System, 10-21
Auditing System Development Mythology, 10-20
Automated Audit Risk Analysis, 7-20
Automatic Data Gathering Anywhere On the Shop Floor, 5-22

*BASIC/Apple IIe,* 6-28
*BASIC Fundamentals and Style,* 6-28
*BASIC Programming Using Structured Modules,* 6-28
*Basic Subroutines For Commodore Computers,* 5-31
*The Basics Of BASIC,* 6-28
Before Disaster Strikes. . ., 1-26
Before You Sign: Negotiating and Structuring Computer Contracts, 5-6
Benchmarking Business-Modeling Software 7-17
Benefits Of Integration: Modeling Systems For Accounting Management, 6-24
Beyond MIPS: Performance Is Not Quality, 4-8
Beyond Partnership, 11-1
Beyond Spreadsheets, 1-20
Bibliography Of 1983 Performance Literature, 5-5
Big Ideas From Smalltalk, 6-17
Big Power In a Small Package: DBMS On Personal Computers, 10-25
Big Projects On Small Machines: Software Engineering On Microcomputers, 12-6
*Bowker/Bantam 1984 Complete Sourcebook Of Personal Computing,* 6-29
Broadening Your Personal Computers' Horizons, 6-16
*Building Controls Into Structured Systems,* 12-29
*Building Effective Decision Support Systems,* 12-28
Building an Information Center That Works, 12-9
Building Up Your Personal Computers. Part I: Data-Output Devices, 7-27
Building Up Your Personal Computers. Part II: Data-Input Devices, 7-5
Building Up Your Personal Computers. Part III: Storage Devices, 10-16
Building Up Your Personal Computers. Part IV: Expansion Boards, 11-21
Buying Software Off the Rack, 3-4

Cabling the Automated Office, 5-11
Can Fifth-Generation Software Replace Fallible Programmers?, 10-3
Can Unix Ever Fit Personal Computers?, 3-19
Canada's Telidon Technology: In Videotex Vanguard, 9-22
Canadian Government Wants Limited Protection For Programs, 11-25
Capacity Management, Part I: It Keeps You Running, 11-15
Capacity Management, Part II: "We've Never Run Out Of Gas," 11-16
Capturing More Meaning In Databases, 9-3
Cellular Radio, 4-18
Central Bank's Computerized Micrographics System Verifies Customer's Signatures, 11-19
Choosing Data Management Software, 8-22
The Climb Toward Intelligence, 12-11
The Coming Day Of Fault Tolerance, 11-7
A Command Language For the Executive, 3-20
Common Sense and Computer Security, 9-10
Communications Software For PC-To-Mainframe Links, 9-21
A Comparative Evaluation Of Ada and Euclid, 3-24

Comparison Of Access Control Software For IBM Operating Systems—ACF2, RACF, SAC, SECURE, & TOP SECRET, 7-24
The Compatibility Myth, 1-28
Computer-Assisted Auditing, 7-19
Computer Backup and Disaster Recovery Agreements, 10-11
Computer-Based Courses: Not All Are Created Equal, 5-15
Computer-Based Training For End Users, 3-9
Computer Control Of Steel Mills, 6-3
*The Computer Dictionary,* 6-29
Computer Graphics: Art Serves Business, 11-28
Computer Integrated Manufacturing, 6-2
Computer-Integrated Manufacturing—From Vision To Reality, 1-13
*Computer Literacy For Business Students,* 5-2
Computer Maintenance Contracts, 5-9
Computer Research In Japan, 8-25
Computer Trends: Networking In Today's Health Care Environment, 12-15
A Computer Turnkey System: An Acceptable Solution For the Competent User, 9-8
Computer Use In Precollege Education, 9-27
Computerized Facilities Planning and Design: Sorting Out the Options Available Now, 7-12
Computers and Corporate Data Security: A Twofold Problem, 12-23
Computers—Fall 1983 Survey Update, 4-23
Computers For the Law Office—Spring 1983 Survey Update, 1-19
Computers Plus Business Equal Liabilities, 11-29
Computers—Summer 1984 Survey Update, 12-20
Computers—Winter 1984 Survey Update, 8-21
*Computing For Engineers and Scientists With Fortran 77,* 5-30
*Conceptual Programming Using BASIC,* 6-28
Conducting the Cost/Benefit Analysis, 12-21
The Confidence Crisis When Buying Vertical Software, 9-9
Connected Clusters, 12-16
Connectivity With Fusion, 12-16
Conography Tackles Graphics On IBM PC, 2-20
Consortium On Software Protection, 4-14
Contingency Planning—A Case Study, 1-27
Contingency Planning For Automated Systems, 8-17
Contracting For Disaster Recovery Services, 10-11
Contracts and the Law, 12-21
Conversing With Computers, 6-25
Coping With End User Computing, 7-1
Corporate Computer Control Guide, 9-13
A Corporate Game Plan For Productivity, 7-7
Corporate Portfolios On Personal Computers, 7-23
Countering Unauthorized Systems Accesses, 6-22
Covering All the Databases, Part I, 7-24
Covering All the Databases, Part 2, 8-19
Covering All the Databases, Part 3, 10-26
Creating a Fail-Safe Hard Disk System, 10-17
Creating Impressions For Data Processing, 9-24
*Critical Issues In Software,* 1-29
Custom Software Contracts, 5-10
The Dark Side Of Small Business Computers, 7-21
The DARPA Internet: Interconnecting Heterogeneous Computer Networks With Gateways, 1-24
Data Administration vs. Data Base Administration—There Is a Difference, 4-1
Data Dictionaries As a Tool To Greater Productivity, 12-6
Data-Driven Prototyping, 1-9
Data-Entry Update, 11-27
*The Data Factory: Data Center Operations & Systems Development,* 12-30
Data-Flow Architecture, 11-4
Data Processing Questions That Executives Need To Ask, 2-9
*Database Design—The Continuous Flow Approach,* 8-28 (incorrect title—should be "Strategic Planning Systems Analysis, and Database Design: The Continuous Flow Approach")
Datacorp, Acctex Create New CAR Concept Built Around IBM PC-Based Software, 4-22
DBMS: Do You Know Enough To Choose? 11-12
Debunking the Myths Of Corporate Micro Acquisition, 5-12
The Decision Maker's Guide To MRP, 1-14
Defusing the Personal Computer Explosion, 10-13
A Delicate Balance, 1-7
Design and Use Of a Program Analyzer, 1-6
Designing For Novice & Expert, 1-3
A DesQ With Nine Views, 11-24
Developers Apply Psychology, 5-14
Developing a Cryptographic System For Electronic Mail, 2-32
Developments In Software Engineering, 8-10
Dimension 68000: The Epitome Of Compatibility?, 4-17
Directory Of Computers For the Law Office: A Survey Of Some Available Management/Financial Systems, 11-26
*Directory Of Public Domain (and User Supported) Software,* 9-30
Document Base Management: The World Needs It, 8-25
Documenting Microcomputer Systems, 4-33
Don't Get Lost In the Software Maze, 11-13
Don't Rush To Court When Your System Fails, 8-18
Don't Underestimate Software Maintenance Costs, 11-17
DP Cost Justification, 2-11
Dragon: The Development Of an Expert Sizing System, 8-10

The Eagle: A High-Flying PC System, 2-24
EDP Insurance, 6-6
Educating Top Management On EDP Performance, 12-1
*Electronic Life: How To Think About Computers,* 1-30
Electronic Mail, 2-15
Electronic Mail: Faster Than a Speeding Bulletin, 11-22
Electronic Mail: Should Computers Carry Your Mail?, 3-21
Electronic Marketing In the 1990s, 1-15
The Electronic University, 2-30
Eleventh Annual Survey Of Performance-Related Software Packages, 3-18
An Emerging Discipline, 7-16
The Emerging LAN Software Market, 12-18

The Emerging Managerial Work Stations, 12-10
End-User Game Plan, 3-6
English: The Newest Computer Language, 4-20
Enhanced Word Processors: Looking More Like Micros, 11-21
*Enjoying BASIC: A Comprehensive Guide To Programming,* 6-28
Environmental Control, Part I: Creating a Healthy Climate For Your Systems, 12-5
Environmental Control, Part II: Tending To Your Micros, 12-5
The Ergonomic Sell, 4-19
*Essentials Of Basic Programming,* 11-32
*Essentials Of COBOL Programming,* 12-29
*Essentials Of Pascal Programming,* 5-30
Evaluating Personal Computers For Process Control, 4-26
Evaluation and Selection Of Mini and Microcomputer Software, 11-11
*Everyman's DataBase Primer, Featuring dBase II,* 7-31
Expert-Ease, 6-18
Expert Systems In Business, 1-8
*Exploring Applesoft,* 12-27

Factors Affecting Programmer Productivity, 9-5
Fault-Tolerant Systems In Commercial Applications, 12-16
Field Automation Support, 2-33
*The Fifth Generation: Banzai or Pie-In-the Sky?,* 5-1
"Fifth Generation" Terminals, 7-6
The First-Time EDP Audit, 6-24
Fitting Machines To Users Boosts Productivity Of Both, 5-13
Flexibility, Not Productivity, 1-12
Floppy-Disk Formats, 11-28
For More Than One, 12-15
Formalizing Internal Controls Documentation and Providing and Documenting Auditability Provisions For Systems, 5-28
*Fortran 77: A Practical Approach,* 4-35
Four Tools To Build Systems Synergy, 1-4
Fourth Generation Software: Where Are We Headed?, 1-2
Friendly To All Or None?, 1-3
Front-End Programming Environments, 11-4

# REFERENCES

The staff of Data Processing Digest regularly monitors an average of 150 computer, trade, educational, scientific, and business management periodicals for appropriate articles to digest each month. The list of periodicals varies widely from year to year, and even from month to month, as new periodicals appear, and old ones die out or change their editorial direction. Every June issue and the year-end annual supplement include all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. All addresses which do not include a country are in the U.S.

Please request copies of originals from the publisher of the periodical. Do not write to *Data Processing Digest*, as we do not copy or reprint, and your request will be delayed. Books should be ordered from their publishers or from a local technical book store.
